Member organizations of Georgian National Platform of Eastern Partnership Civil Society National Forum declare their solidarity to GYLA

On September 6, 2011 the Georgian Young Lawyers' Association (GYLA) submitted to public independent forensic report from DAS Fingerprints/Forensics Ltd. (forensic bureau established in UK) regarding circumstances of Nika Kvintradze's death, one of the persons who died during the developments of May 26. The report contains important information for investigation of circumstances of Nika Kvintradze's death.

Following the publication of independent forensic findings, the Ministry of Interior accused GYLA in deliberate dissemination of false facts. Representatives of state authorities made incorrect comments towards GYLA blaming the organization for involvement in "political games". At the same time, *Kurieri* news on Rustavi 2 and *Kronika* news on Imedi for several days broadcasted reports prepared in full disregard of journalistic standards and ethics aimed to discredit GYLA. We are particularly concerned that GYLA's right to get and disseminate

professional information that is inseparable and important part of human rights' NGO questioned as opposed to credibility of forensic findings.

Member organizations of Georgian National Platform of Eastern Partnership Civil Society Forum declare their solidarity to the Georgian Young Lawyers' Association. Considering expressed accusations unfounded and the negative campaign carried out by certain TV Companies unacceptable, we call on

The Delegation of the European Union to Georgia – to assess the discrediting campaign carried out against GYLA according to “EU Guidelines for Human Rights’ Defenders” and express its position.

The Government of Georgia - to curb such an unfounded attack against civil society representatives, in order to not discredit the organization and the NGO sector as a whole and not to harm the democracy image of the country.

Media Representatives - namely, Rustavi 2 and Imedi broadcasting companies to observe journalistic ethic norms that obliges the broadcaster to submit news and facts impartially with due accuracy, when preparing a news report.
